Office Action Summary	Examiner	Art Unit					
	Kishor Mayekar	1753					
The MAILING DATE of this communication app Period for Reply	ears on the cover sheet v	vith the correspondence address					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).							
Status							
<u></u>	action is non-final.						
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213.							
closed in accordance with the practice under E	x parte Quayle, 1955 C.	D. 11, 455 O.G. 215.					
Disposition of Claims	,						
4) ☐ Claim(s) 1-28 is/are pending in the application. 4a) Of the above claim(s) is/are withdraw 5) ☐ Claim(s) is/are allowed. 6) ☐ Claim(s) 1-28 is/are rejected. 7) ☐ Claim(s) is/are objected to. 8) ☐ Claim(s) are subject to restriction and/or	vn from consideration.						
Application Papers							
9) The specification is objected to by the Examiner. 10) The drawing(s) filed on is/are: a) accepted or b) objected to by the Examiner. Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a). Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d). 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.							
Priority under 35 U.S.C. § 119							
12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of: 1. Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received.							
Attachment(s) 1) Notice of References Cited (PTO-892) 2) Notice of Draftsperson's Patent Drawing Review (PTO-948) 3) Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08) Paper No(s)/Mail Date	Paper No	Summary (PTO-413) b(s)/Mail Date Informal Patent Application (PTO-152)					

DETAILED ACTION

Oath/Declaration

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not identify the ZIP Code designation in the mailing address of the last inventor.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 3 and 26 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make

and/or use the invention. The specifications fails to describe the variable \times in $Mn_{\textbf{x}}O_{\textbf{2}}$.

4. Claims 3, 26 and 33 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 3, the variable x in Mn_xO_2 is not defined.

In claim 26, the same is applied to claim 3.

In claim 33, the phrase "said substrate" lacks antecedent basis.

Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 10/736,921

Art Unit: 1753

Claims 1-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over 6. Reisfeld et al. (US 2003/0021720 A1) in view of Kobayashi (US 6,368,668 B1). Reisfeld's invention is directed to a control for photocatalytic air purifier. Reisfeld discloses in Figs. 1 and 3 a fluid purification comprises the recited container, porous substrate (filter) wherein the porous substrate is coated with a suitable catalytic coating, for example a coating of titanium dioxide [paragraph 0024], device for drawing a fluid and UV light source. The difference between Reisfeld and the above claims are the provision of a multi-layered catalytic coating applied on the substrate with the recited order. Kobayashi shows, in a method for producing a photocatalytic material for use in the purification of harmful gases, that the photocatalytic material is obtained from a photocatalyst coating composition comprises the recited components in each of the recited layers (col. 3, lines 63-67 and paragraph crossing cols. 5 and 6). Kobayashi also shows a substrate with a plurality coating of different photocatalyst composition (col. 10, lines 17-30). The subject matter as a whole would have been obvious to one having ordinary skill in the art at the time the invention was made to have incorporated other semiconductor components and precious metals or transition metal oxides in Reisfeld's teachings as shown by Kobayashi because this would further increase Application/Control Number: 10/736,921

Art Unit: 1753

the photocatalytic efficiency of the photocatalyst material. As the order of the coating in the multi-layered coating, the motivation to make a specific structure is always related to the properties or uses one skilled in the art would expect the structure to have, In re Newell 13 USPQ 2d 1248, Fromson v. Advance Offset Plate 225 USPQ 26; In re Gyurik 201 USPQ 552.

As to the subject matter of claim 4, the selection of thickness of the first layer would have been within the level of ordinary skill in the art.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kishor Mayekar whose telephone number is (571) 272-1339. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nam Nguyen can be reached on (571) 272-1342. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR.

Application/Control Number: 10/736,921
